

**CIRCULAR NO.12/76**

Sub:- Formation of Nursery – Instructions issued –

\*\*\*\*\*

The following instructions are issued on the points brought to my notice during field inspection for information and compliance.

1. Size of polythene Bags.

The size of polythene bags for nursery works be enhanced from 15 cm x 8 cm to 18 cm x 12 cm.

2. Size of standard Nursery bed.

The size of standard nursery bed be specified as 3 m x 1.25m restriction on length is found necessary width alone need be specified. This is particularly so since stumps are not uprooted from the nursery sites.

3. Bamboo Thatties

Provision for bamboo thatties may be retained. But there is no necessity for ramping nursery beds since it will cause desciceation. Then bamboos are not available, brushwood may be used. Bringing bamboo after providing long distance conveyance is very costly.

4. In the case of Teak Nurseries 5 Kg per bed will be sufficient

5. The above instructions may be borne in mind when nursery beds are formed and adhered to in future.
