

CIRCULAR NO.8/62

Instances have come to the notice of the Chief Conservator of Forests that the Forest subordinates in certain cases affect excess supply that the quantity actually sanctioned. This state of affairs will lead to unnecessary correspondence with Government and with subordinate offices. In certain cases the officers allow alternate specie to the specie sanctioned on the score that the timber sanctioned is not available under the denote of his jurisdiction. This will lead to chaos and confusion in realizing value from the party or it will give room for audit objections etc. To avoid these incidents all Conservators and Divl. Forest Officers are hereby informed that not even c.ft. of timber will be measured over to the recipients in excess than the quantity actually sanctioned. If timber cannot be supplied to the exact quantity sanctioned, the officer responsible can supply timber to the maximum quantity allowable delimiting to the total quantity sanctioned. Any deviation from this order will be seriously dealt with.
