

Copy of letter No. P1-2407/76 (KDis) dated 5-8-76 from K.K.Nair, Chief Conservator of Forests (DEV) to the Conservator of Forests, Trichur

Sub:- Replacement of casualties in coppice plantations.

It has been reported by the Conservator of Forests, Quilon that it will be risky to lease out the coppice area for taungya cultivation since it is likely that the roots may get damaged while digging the soil for tapioca cultivation and that any damage to the root system may invite fungus growth also. It is also stated that canopy will be much closer than-in most of the coppices areas and taungya cultivation in such area will be harmful to the coppice shoots. On examination it is seen that the above observation is quite valid. Hence all Conservators of Forests are directed not to lease out for taungya cultivation coppiced Eucalyptus plantations hereafter.

Yours faithfully,

Sd/-

For Chief Conservator of Forests.

Endt. on FS. 17023/76 Dated 16-8-76
