

Copy of Circular No.50/71 on PL-60897/78 dated. 22-11/12-12-78 from the Chief Conservator of Forests to all CFs /DFOs.

Sub:- Coppicing of Eucalyptus hybrid - No. of shoot to be retained.

It has been noticed by the undersigned that the Circular instructions issued earlier, reg: the retention of coppice shoots in the Eucalyptus plantations, are not observed in some Divisions. The rate for the work of reduction of coppice shoots to 2 or 3 per stool approved by Govt. had already been communicated to all sub-offices in P3-36688/74 (D.Dis) dated. 11/11/75. The Silvicultural Research officer has also informed all sub-officers on 14-9-'76 that 2 to 3 shoots only need be retained in Eucalyptus hybrid plantations on the basis of the preliminary observations carried out by him. In the circumstances, all officers are once again informed that 3 coppice shoots per stump alone need be retained in Eucalyptus plantations.

The receipt of the Circular may be acknowledged.

(Sd.) Chief conservator of Forest.

Endt. on MR-20042/78 dt. 20.1.'79.

Copy to all contract sections (CH/ML/TR/KT/ML) for information.

For Conservator of Forests,
