

Copy of Circular No.49-76(P1-29770-760 dt.12.7.1976 from the Conservator of Forests (Planning) in charge of Chief Conservator of Forests (Devpt.) to all Conservator of Forests and All Divl. Forest officers

Sub:- Cost of raising teak nursery.

It has been brought to the notice of the undersigned that in an estimate sanctioned by a Divl. Forest Officer Provision is seen made for bamboo, more than the actual required numbers for the purpose of bamboo thatties and for page also. The cost of raising teak nursery can be reduced considerably if the Divl. Forest offices and Conservators of Forests pay a little more careful attention and supervision. As far as possible local available materials should be used for keeping the nursery bed in test. The idea of providing bamboo thatties is for this purpose and not as an inevitable item of expenditure to be provided. Therefore while sanctioning estimate, the Divl. Forest Officers/ Conservators of Forests should use their personal knowledge of the area and of the availability of local materials and take a decision instead of mechanically following what is provided in the schedule of rates.
