

No. VE3-3424/81

Office of the Chief Conservator of Forest, Vigilance,
Trivandrum, Dated: 5-6-81

CIRCULAR NO. 1/1981

It has come to my notice that item No. 155g of the schedule of rate is wrongly applied in sanctioning estimates by in certain Officers. The above schedule item is amount for altering coconut concealing planted on a small scale in Office and Department compounds. Hence there is no property in adopting this rate for watering of pepper growth on a plantation scale. In the letter, in the plants are raised at close intervals and the quantity of water required for them will be much less. When compound to coconut seedlings.

In the absence of scheduled of rate for watering cocoa and pepper plants, it is not correct to adopt any other rate. It is highly irregular to claim, recommended sanction and in over expenditure based on schedule of rate not strictly applicable.

In the above circumstances, It is up to the Conservator of Forests to conduct to work in their presence, report the distend to Chief Conservator of Forests so that the item may be get approved by Government and incorporated in the schedule of rate as an additional item.

The Officers, who claim, recommended, sanction and in our expenditure beyond and the admissible limit will be personally responsible for the extras expenditure caused to the public exchequer.

The receipt of the circular should be acknowledged.
