

Copy of the letter No. P2-15268/89 dated 22.5.1989 from the Chief Conservator of Forests, Trivandrum to all C.Fs, D.F.Os, A.C.Fs.

Sir,

Sub: - Work study on digging pits – reg.
Ref: - Committee report dated 19.4.1989

As decided in the last Chief Conservator's council, a committee has constituted to conduct test work for digging planting pits. The recommendation of the Committee for digging pits before rains is as follows: -

1. Digging pits of 30cm x 30cm x 30cm
In ordinary soil during dry weather : 1.8182mm for 100 pits.
2. – do - - do -- in hard soil
During dry weather. : 2.5641mm for 100 pits.

After review of the recommendation of the committee, it is hereby ordered to follow the above rates for digging planting pits of 30cm x 30cm x 30cm size with immediate effect.

For digging pits after rains, work study has not been conducted so far. However a proportion in the out turn now exist is taken into account for the time being and the following rates are worked out.

1. Digging pits of 30 cm³ in ordinary soil after rains : 0.9229 mm for 100 pits
2. –do-- --do—in hard soil after rains : 1.3015 mm for 100 pits.

The above rates will come into force immediately. The receipt of this letter should be acknowledged by return.

Yours faithfully
