

Copy of letter no. VE2- 183/89 dated 4-1-1989 from the Chief Conservator of Forests (Vigilance), Trivandrum. To the Conservator of Forests, Trichur.

Sub : - Fire protection works - regarding

The fire protection works have been started in most of the Division. In order to check the works at random the Range Officers under you may be directed to furnish the following information to the Divisional Forest officer, Flying Squad concerned immediately.

1. Whether any fire watchers have been engaged and if so where how many and from which date.
If not watcher is changed that fact should be reported.
2. It is noticed that 40 man mazdoor/ Km are engaged for clearing and tracing fire line. Wherever previous fire lines are very clear like in grass lands, open barrow areas this such labour is not required. That is the reason, in some divisions only 20 man are engaged/ km for the work. This may be borne in mind while executing the work.
3. Measurement book may be properly countered for fire tracing works. The officers engaging watchers should have full address of watchers.

Yours faithfully,

Sd/-
Chief Conservator of Forests (Vigilance)

Copy to Divisional Forest Officers, flying squad..... The above information may be collected from all Rangers concerned.

True Copy

For Conservator of Forests,
Trichur.
