CIRCULAR NO. 25/67

37/33

710!

(To furnish details of work done & pending)

Sub: Forests - Extension of contract period - recommendation of regarding.

R

It is often noticed that while recommending extension of contract periods, the Conservators of Forests do not furnish details of works turned out by the contractors during the original contract period and during the extension periods allowed by the Divisional Forest Officer and the Conservator of Forests and the balance works remaining to be done as per the contract. It is absolutely essential that the details are known for deciding further extensions and for recommendations to Government as the case may be. In the absence of the above details it often becomes necessary to refer back to the concerned Conservators of Forests calling for such details thereby causing undue delay. To obviate this position it is desirable that the Conservators of Forests to furnish full details so as to decide the question without further reference to them. In certain cases it may not be able to furnish correct details. In such cases at least a general idea of the progress so far achieved and the balance works remaining to be done should at least be reported. Recommendations received from the Conservator of Forests without the above details will not ordinarily be accepted.
